Hello,

Greetings!!!

You are assigned to complete the following task for next round and send update to us on or before **19-Feb-18**. and also you should be prepared for the demo session for the same.

Project Name : Employee Management

Technologies to be used : JSP/HTML, Java script, CSS, Servlet ,Any Database connection and tomcat server. – **Java Technologies**

Functionality: Employee CRUD operation as below.

Create / Update:

It should have following fields.

1. Employee Id * - Create mode - auto generated, Update mode - Read Only.
2. Name(First and Last Name) *
3. Date of Join *
4. Department *
5. Salary
6. Experience – (Yes/No) - Dropdown
7. Address (Permanent and Present address)
8. Education Details (Qualification, University/College ,Percentage, Completion year)
9. Contact No *
10. Email ID *
11. Active Status * - (Active / Inactive) – Dropdown

Employee Display and Delete:

All active employee should be displayed with below fields in table format.

Employee Id - On click it should redirect to employee Update screen.

1. Name
2. Date of Join
3. Department
4. Contact No
5. Email ID
6. Highest Qualification
7. Delete button – On click inactive the particular employee in database.

Notes:

Following should be used

1. Input validation ((*))Mandatory Fields, Date and Email)
2. Two or more tables(To persist the employee details).

3. Constraint for tables.
4. Deployed in Tomcat server.

Adding more features and innovative thoughts are encouraged and will be given additional credit points.

Please reply back if you need any clarification required.

Best Regards,

Sugandhan Rajasundaram(Sugu)
